

International Freight Forwarder

Fashion & Textiles

Avion has extensive experience in managing and handling international shipments of well-known luxury fashion brands.

International shipping of fashion products and garments: Avion's end-to-end, integrated solutions including pick & pack warehouse operations.

The ability to organise import and export activities by connecting different shipping methods, by sea, land and air, allows Avion to meet the tightest delivery times required by manufacturers and retailers of international luxury brands. 3PL warehouse solutions support local requirements in Australasia.

Unwavering commitment to customer satisfaction, customised solutions and an unyielding dedication to delivering higher standards in global logistics mean that we consistently exceed our client's expectations.

This Year's Numbers

We are passionately committed to provide international freight forwarding services, whether import or export.

28+

Years Experience

We, at Avion, have been operating since 1995. Our company's bond with the world of shipping originated 70 years ago.

100+

Team of Experts

We believe that the very best services must, first and foremost, have an energetic and dynamic team behind it, made up of motivated experts.

100000

SQM

Ambient space available for any expansion plans. 850 m2 for product & packaging, 100 m2 for visual merchandise.

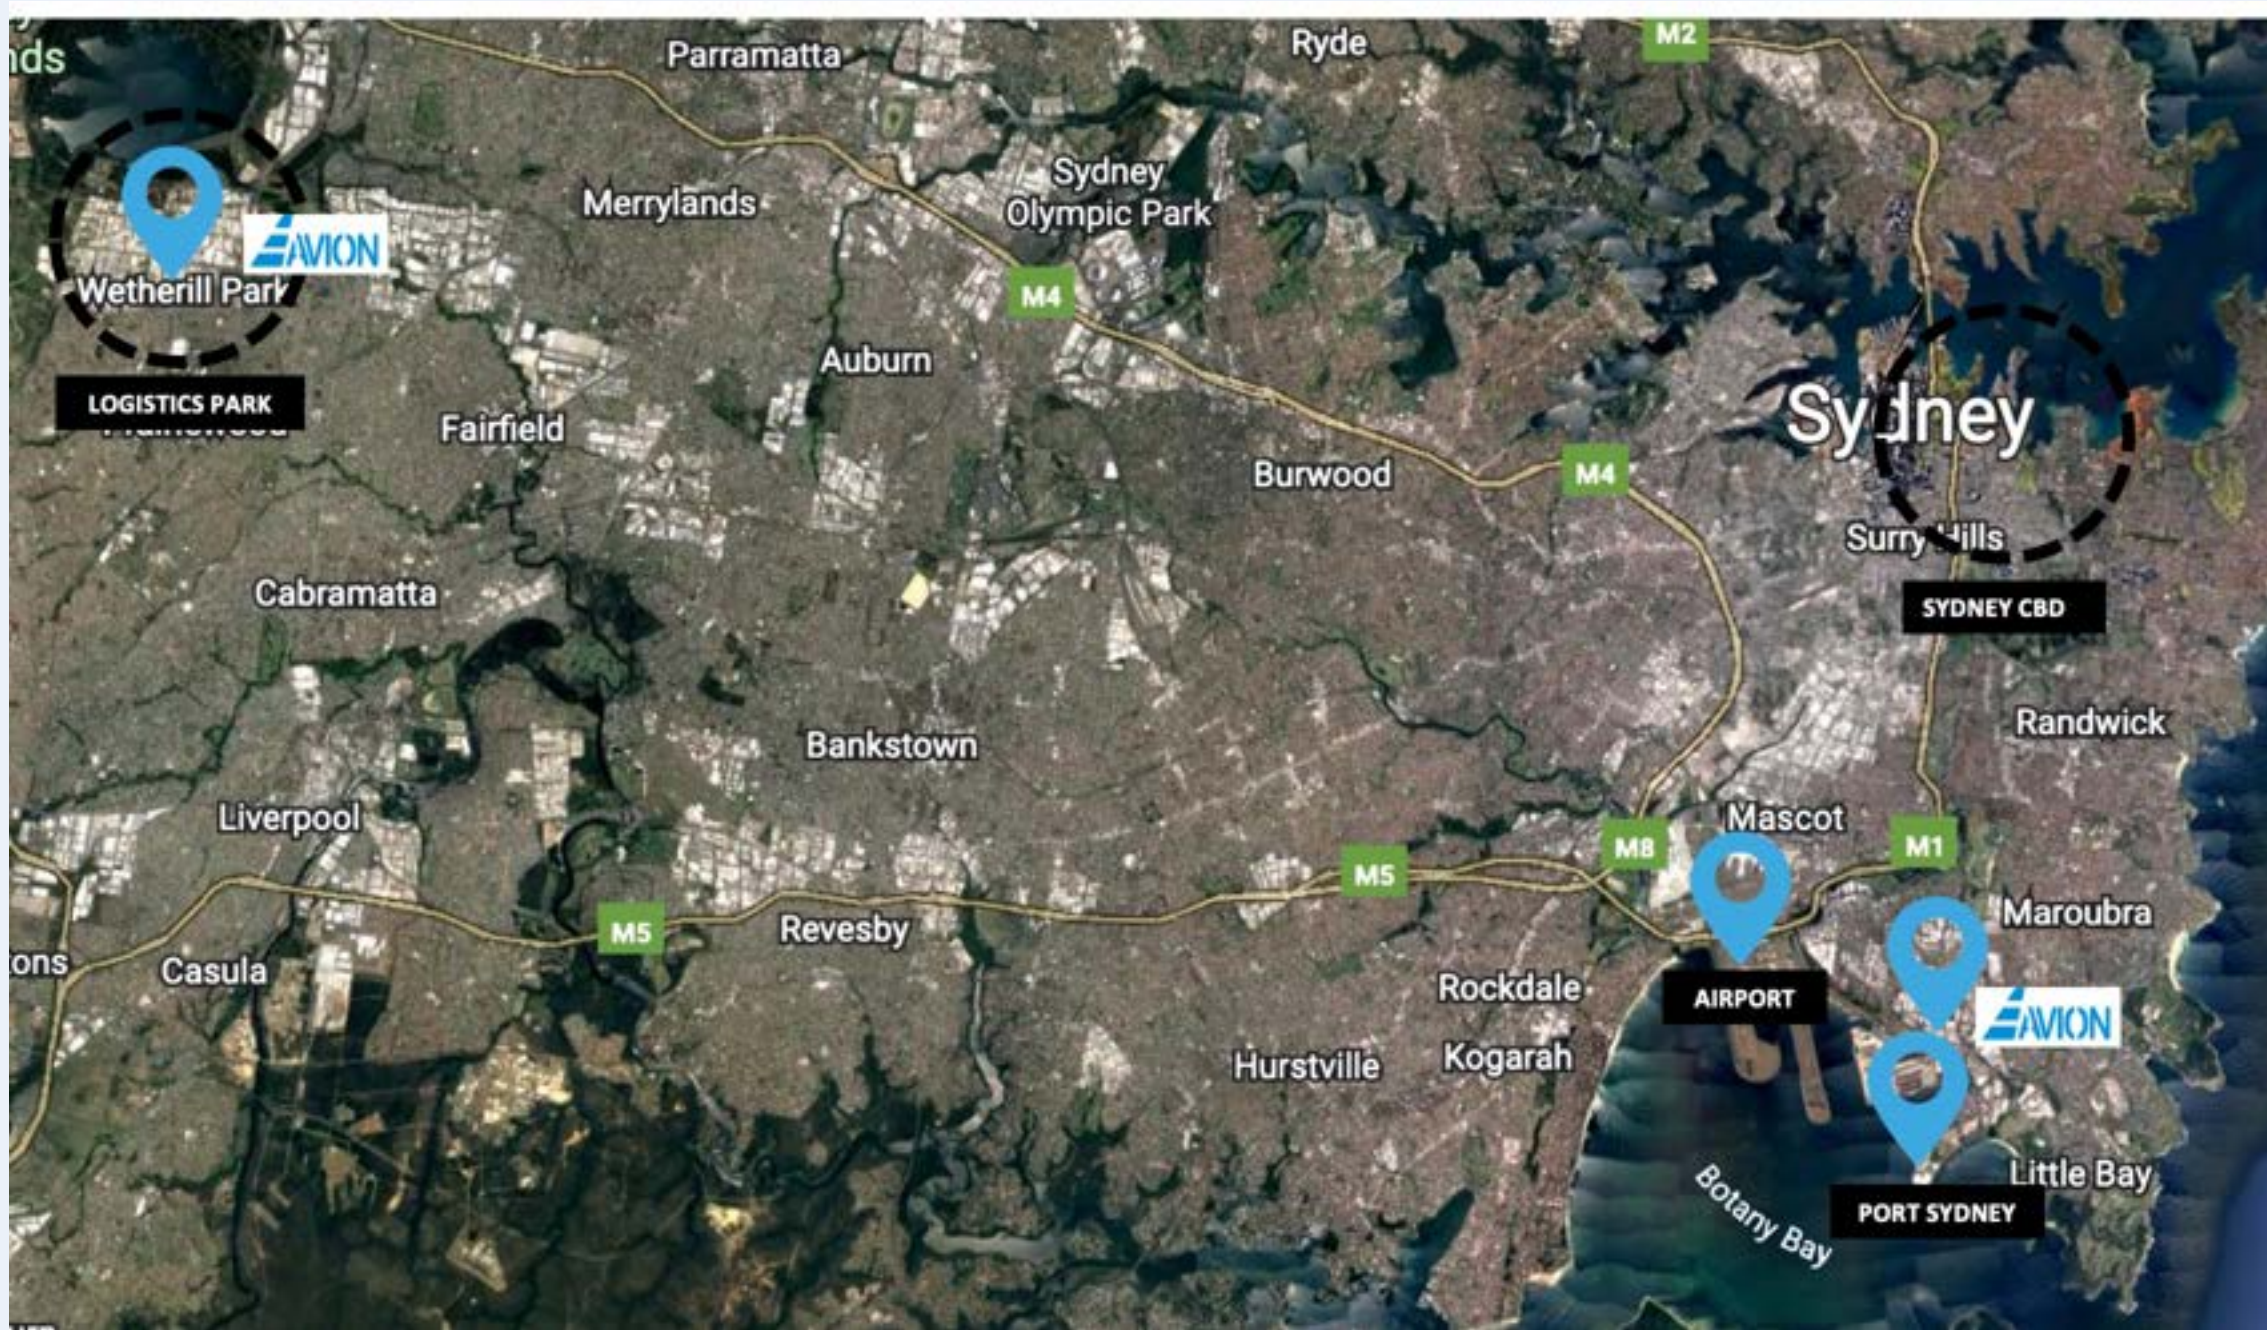

24/7

Security Monitoring

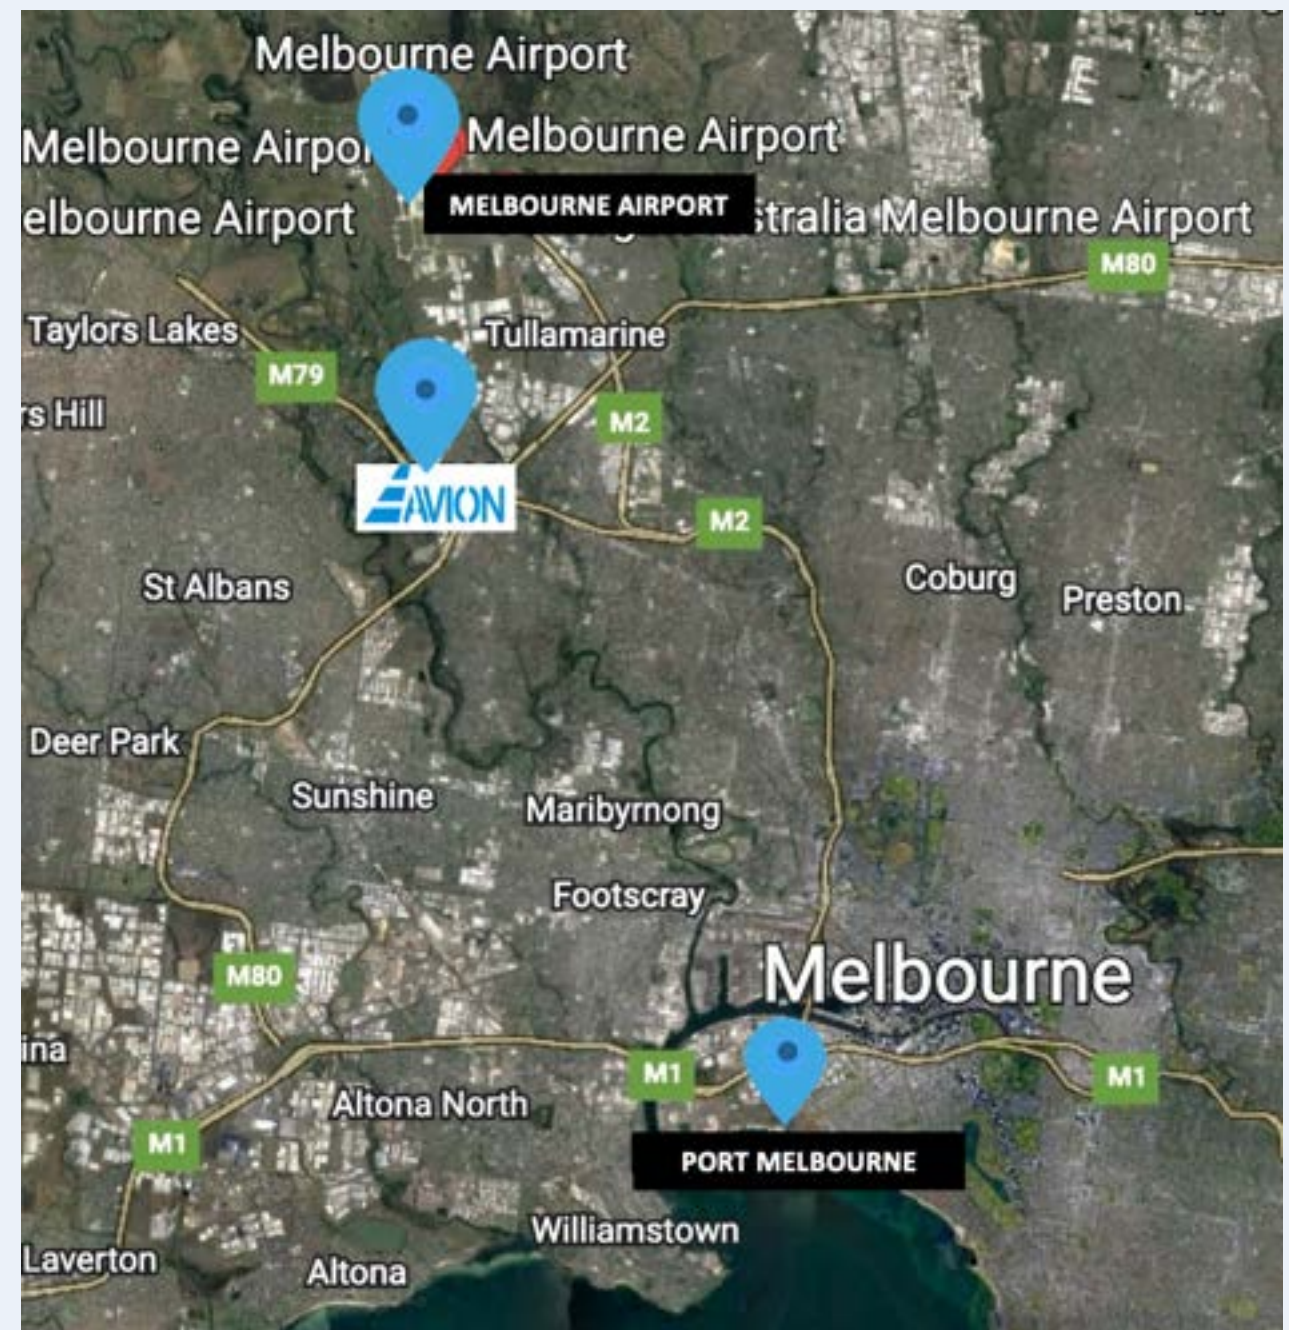

Warehouse will be monitored 24/7 by Cameras to monitor access and exit points. Security guard in place for the whole complex. Emergency alarm and fire facilitation too.

Professional, Flexible, Safe and Secure International Shipping Solutions

Whether by sea, rail, air or land, we are committed to shipping and handling the finest luxury goods with care and precision. Our extensive experience in handling luxury goods has established Avion as an internationally recognised top industry leader.

Air. We optimise the handling of goods in every way through partnerships with airlines.

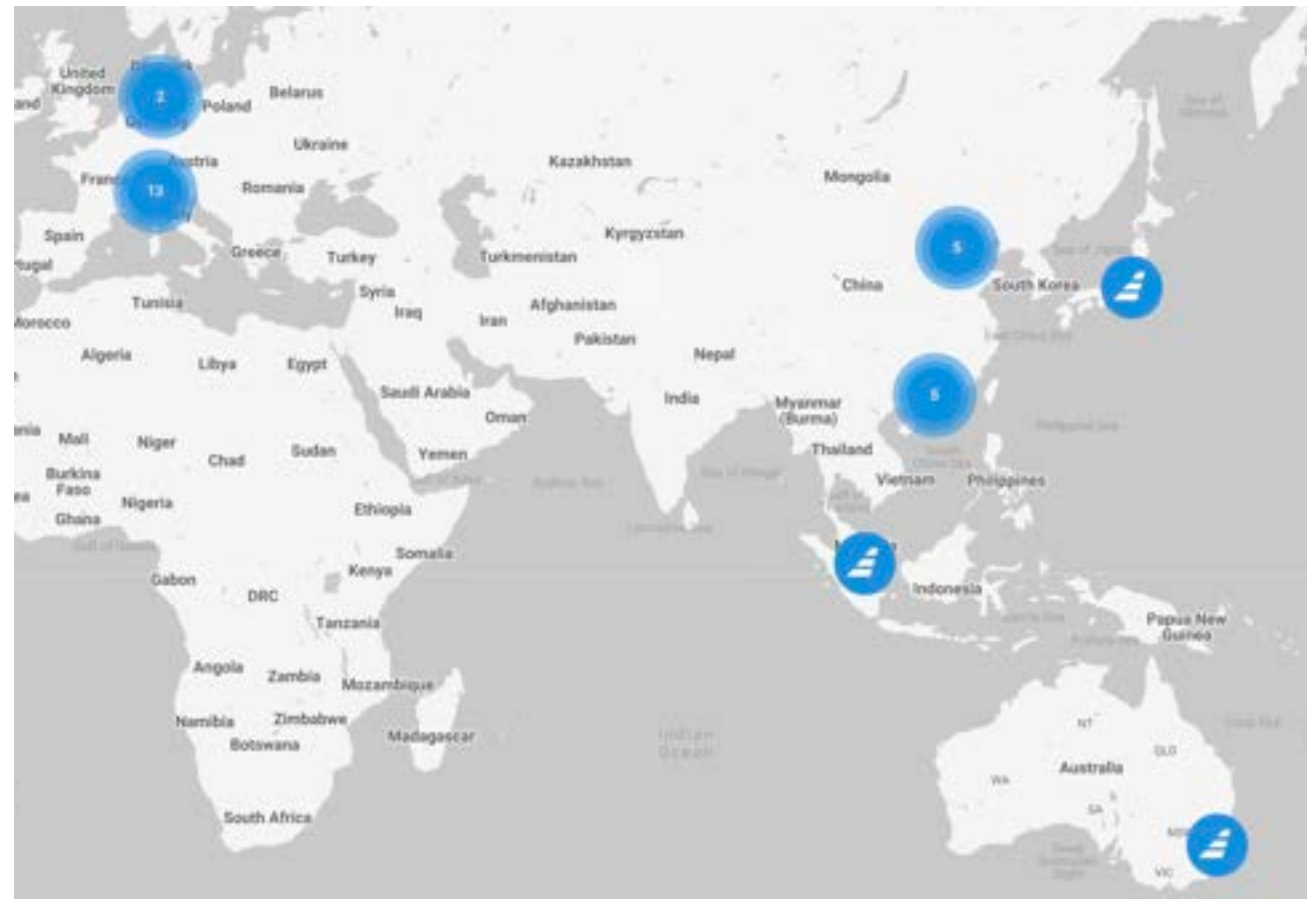

Sea. We ship goods by sea with international coverage, with all major shipping lines for FCL and containers with our own LCL consolidations.

Land. Avion's Road Service Team manage international road freight shipments to and from the air and ocean ports including last mile delivery.

Warehousing. Avion's sophisticated warehousing solutions include pick and pack services, controlled temperature storage, bonded warehouses and flexible storage solutions to meet our customers requirements.

Our Network

Every day, we deal with different needs for international luxury goods shipments by air, sea and land. For each lead shipment, we study with you the very best way to optimise times and shipping costs. Constant communications between Avion's European and international offices guarantees an up-to-date and global approach.

Our network of professionals with different expertise in the main strategic hubs of global trades, includes:

ITALY	Naples	EUROPE	ASIA	OCEANIA
Bologna	Rome	Germany	China	Australia
Civitanova Marche	Sesto Fiorentino – Florence	Poland	Japan	
Gallarate	Turin	Spain	Singapore	
Genoa	Treviso			
Malpensa Airport	Vicenza		AMERICAS	
Milan			USA	

Australia's Infrastructure For Fashion only

Fashion Logistics Space

- 5000 m2 for product and packaging, 500 m2 for visual merchandise
- Main warehouse: New product, mainly used by wholesale division and replenishment for stores of latest season
- Outlet warehouse: stock returned from stores, samples, stock not sold by stores, aged stock.
- Stock is stored as GOH (approx. 25%) and another portion flat in cartons.
- Products and related materials will be properly stored to the highest standard, in a temperature/humidity-controlled environment. Clean space, minimising exposure to dust and an enclosed location in a light and medium shelving structure.

Storage

- GOH fixed racks (all GOH items will be protected by plastic sleeves), flat items in shelves inside carton bins, stored in a way that maximizes operational efficiency.
- Location mapping follows 3 levels of segregation: Row, Column, Level.
- Each pick-face bin number is allocated in a fixed bin location.
- The warehouse runs a WMS (warehouse management system) to control all stock and pick & pack orders.

Service Level Details

Minimum operational requirements inbound:

- International inbounds: 1,850 units per day as minimum requirement, maximum 3,000 units per day.
- Local inbounds: 900 units per day as minimum requirement, maximum 1,800 units per day.
- Report damage to packages: same day as arrival to warehouse.
- Report discrepancies of units: by COB following business day of physical delivery.
- ASN acceptance: by COB second business day after delivery (including quality check for local inbounds).

Service Level Details

Minimum operational requirements outbound:

- 2000 units to be dispatched per day as minimum requirement. This applies to orders transmitted to WMS by 5 pm at the latest on the business day prior required for dispatch.
- 100 units minimum availability for same day order dispatch. This order is to be submitted and available in WMS system by 12 pm (time can be negotiated). Maximum 200 units for same day dispatch.
- Outbound to be completed in WMS by COB the day of dispatch.
- Accuracy: 100%
- Pick time accuracy: 100%
- Process outbound will be via RFID.
